### **Screaming Circuits Introduces New Online Bill of Materials Quoting**

*All-in-one online quote for parts, PCBs and assembly labor*

CANBY, Oregon October 2012 – Screaming Circuits has just introduced its new online Bill of Materials (BOM) quoting system, making it even easier to place complete PCB assembly orders. Customers can quote assembly, PCB fabrication and components, all online, real-time and automated. The BOM ordering process automatically integrates the parts, boards, and assembly into one online quote and order process. With this web site addition, Screaming Circuits offers online self-service turnkey, as well as full “Valet service” turn-key for orders with additional requirements.

The Screaming Circuits website maintains its easy ten question assembly quote process and integrated quoting of PC board fab. With this new addition, a customer’s bill of material is uploaded, automatically identified and quoted without delay. This process displays the BOM grouped into lists of parts quoted and ready to be ordered, out of stock or needing human attention, and customer designated as do not place.

“The engineer’s job just keeps getting more difficult, with tighter schedules and less help” said Duane Benson, Screaming Circuits Marketing Manager. “By combining assembly, fab and parts quoting and ordering, and automating as much as possible, we’re making the prototyping process easier. The engineer can spend more time designing and less worrying about how to get prototypes built.” Parts quoting simply requires the upload of a reasonably formatted BOM in Excel spreadsheet form.

Screaming Circuits, along with the company’s production volume EMS (Electronics Manufacturing Service) and electronics design services divisions is continuously looking for ways to improve the electronics manufacturing process; from design, to prototype and through finished product. To find out more, visit [www.screamingcircuits.com](http://www.screamingcircuits.com).

### **About Screaming Circuits and Milwaukee Electronics**

Screaming Circuits was formed in 2003 as a quick-turn prototype division of Milwaukee Electronics, a privately held ISO 9001-certified contract manufacturer, offering design and turnkey production volume assembly services to blue chip OEMs. For more information, visit Screaming Circuits on the web at [www.screamingcircuits.com](http://www.screamingcircuits.com) or the company blog at [blog.screamingcircuits.com](http://blog.screamingcircuits.com).

## Trademarks

Screaming Circuits, and the Screaming Circuits logo are registered trademarks of Screaming Circuits, a division of Milwaukee Electronics. Milwaukee Electronics is a trademarks of Milwaukee Electronics.
