

FOR IMMEDIATE RELEASE

Screaming Circuits Ten Year Anniversary Open House

Screaming Circuits Celebrates Ten Years Specializing in Fast Prototype Assembly

Canby, OR – July, 2013 – Screaming Circuits, specialists in quick-turn prototype and short-run pc board assembly, is holding an open house to celebrate ten years of business. The service started up, as a prototype division of Milwaukee Electronics, in 2003 and the online quote and order e-commerce website went live in 2004. Since that time, thousands of customers have placed assembly, bundled fab and assembly or bundled parts, fab and assembly orders on the website www.screamingcircuits.com.

The open house is being held in Canby, Oregon on July 18, 2013, from 3:00 pm to 7:00 pm, Pacific Standard Time. Electronics Engineers who want to attend can rsvp at: rsvp@screamingcircuits.com. “We decided to make this an engineer’s event rather than a company event” said Duane Benson, Screaming Circuits marketing, “so we’re opening the facility up for tours, refreshments and information – and to open it even further, we’re broadcasting the event live.” The event can be watched on the web at: <http://scrm.it/JULY18> during the hours 3:00 to 7:00 pm PST.

Screaming Circuits will be joined by long-time partner and special guest Sunstone Circuits (www.sunstone.com), and will have demonstrations and presentations during the event hours, which will include PCB123 CAD software, the Portland State Aerospace Society, BGA layout / design tips and tutorials on the use of the service.

The event is open to electrical engineers whether they be customers or not. The only requirement Screaming Circuit asks is to RSVP at: rsvp@screamingcircuits.com. Complete details on the event can be found at: <http://blog.screamingcircuits.com/10-years-of-screaming-at-circuits.html>.

####

About Screaming Circuits and Milwaukee Electronics

Screaming Circuits offers the only online, real-time, complete prototype quote, order and build process in the Industry. After the prototype phase is complete, Screaming Circuits' electronics manufacturing service division, MEC Companies, offers full production manufacturing including design engineering, materials management, assembly and test. Screaming Circuits was formed in 2003 as a quick-turn prototype division of Milwaukee Electronics, a privately held ISO 9001-certified contract manufacturer, offering design and turnkey production volume assembly services to blue chip OEMs. For more information, visit Screaming Circuits on the web at www.screamingcircuits.com or the company blog at blog.screamingcircuits.com.

Trademarks

Screaming Circuits, and the Screaming Circuits logo are registered trademarks of Screaming Circuits, a division of MEC Companies. MEC, MEC Companies and Milwaukee Electronics Companies are trademarks of MEC Companies.
